

HEP Comments/Clarification

P.D. Bond

April 18, 2007

BNL HEP FY07 budget

ATLAS project	19.9
ATLAS/Neutrino	8.4 (incl det R&D)
Theory	2.7
Accelerator R+D	5.6
Waste Mgmt	0.6
LSST	0.4
TOTAL	37.6

Some comments/clarification

- LDRD – Since Instrumentation Division is supported from the same source (G&A) we view Lab support as the sum of LDRD, PD and a fraction of Instrumentation
- We are well aware of the infrastructure needs for ATLAS and are working to solve the problem
- I believe the base support for Daya Bay NP people will be OK
- The skewed age profile in HEP has a number of origins –
 - Labwide issue caused by declining budgets
 - Migration of mid-level HEP people to RHIC in the 90'sWe are working to address it through inducements/joint appointments
- We believe we are focused on exciting forefront science –
is our self evaluation of being in-tune with national priorities and focused appropriately a correct impression ?
