Review Scope: This meeting time is scheduled for completion of an Instrument Readiness Review for the subject instruments. The scope of this review includes equipment inside the accelerator enclosure and outside that enclosure on the experiment floor. A detailed scope is defined in each Instrument Readiness Plan.

This IRR is intended to verify readiness to begin technical commissioning of the Cell 02 FE and ID and to verify system readiness for the 12-ID beamline. A Tailored Review Plan has been developed for 12-ID to provide details on the sequence and basis of managing readiness of this instrument.
