

# SSRL Partner User (PU) Access

- Partner User Access includes two levels:
  - *Collaborative Access Proposal (CAP)*—targeted beam line enhancement or development of new research area
  - *Participating Research Team (PRT)*—development of an entire beam line with a longer term commitment including operations resources
- Expect significant collaboration with SSRL and positive impact on the general user program with beam line managed and operated by SSRL
- Review done by SSRL management and SAC
- Formalized through an PU agreement, e.g., MoU, specifying contributions, milestones, responsibilities for developments/support, and deliverables
- Renewal process detailed in the PU agreement (every 1-2 years for CAP and 3 years for PRT). Final renewal decisions made by SSRL Director.
- Access policy described in more detail in Section 2.2 of:
  - <http://www-ssrl.slac.stanford.edu/content/user-resources/user-facility-access-policy>
