

# New York Scientific Data Summit 2020:

## Data-Driven Discovery in Science and Industry

This year, the sixth annual New York Scientific Data Summit is moving online!

As part of its continuing effort to accelerate data-driven discovery and innovation in science and industry, NYSDS 2020, a multi-day virtual event slated for October 20-23, 2020, will focus on **Applied Mathematics** challenges impacting climate science, medical research, critical infrastructure and other cross-cutting research topics.

### Virtual Conference Format

This event will be held virtually using the Zoom for Government conference tool.

To accommodate participants from different time zones, each day will begin at 9 a.m. PT/12 p.m. ET and devote a half day to one applied math topic, featuring keynote and invited presentations, panel discussions and Lightning Talks from accepted submissions.
