

PSD FY 2015 ESH IMPROVEMENT PLAN

PREPARED BY ANDREW ACKERMAN

This document defines the actions planned for FY 2015 for improving the PSD ESH programs.

Improvement Goals for FY15

- 1) Generate a summary report to characterize the radiation measurements collected during linac, booster, and storage ring commissioning. Use the data to identify any needed controls for managing personnel radiation doses.
- 2) Optimize recycling and reuse of chemicals and Beryllium articles from building 725.
- 3) Implement slip simulator training; train 25% of the directorate staff.
- 4) Bring machine shops into compliance with SBMS. Configure 5 machines each month with required hardware.
- 5) Complete 5 SHSD manual lifting surveillance guides and 5 SHSD laceration protection surveillance guides.
- 6) Implement an ESH review program to identify, evaluate, and control the risks presented by User experimentation.
- 7) Implement the BNL program for print management as a sustainable business practice directed at improving environmental stewardship performance.
