

MX Frontiers
at the One Micron Scale

July 23-24, 2009
Brookhaven National Laboratory, Upton, NY 11973

This workshop in the NSLS-II New Opportunities series will explore structural biology scientific opportunities anticipated from the use of micro-beams in macromolecular crystallography.

Themes

New scientific opportunities
Physics of radiation damage
X-ray optical requirements
Challenges in instrumentation
New crystallographic methods

Speakers

David Eisenberg
Gwyndaf Evans
Kenneth Evans-Lutterodt
Robert Fischetti
Elspeth Garman
Wayne Hendrickson
James Holton
Antonio Lanzirotti
Irene Margiolaki
Sean McSweeney
Colin Nave
Christian Riekel
Gebhard Schertler
Clemens Schulze-Briese
John Spence
Masaki Yamamoto
